Subject: "Sangeet Sanskar" – A New Initiative: The Role of Music in Personality Development

The values instilled in a person from childhood play a significant role in shaping them into a responsible and sensitive citizen. Music is one such powerful medium that leaves a deep and lasting impact on an individual's personality. Therefore, music has always been regarded as an ideal means for holistic personality development. It contributes significantly to intellectual growth by enhancing concentration, memory, imagination, empathy, and creativity. These developmental processes also help improve an individual's emotional sensitivity.

For this reason, musical values are incorporated more effectively through lullabies, devotional songs, folk songs, and hymns. As students progress in music education, their confidence grows. Music also helps in reducing stress and anxiety. Research has shown that musical learning enables students to develop their unique identity. It strengthens their ability to think critically, make decisions, maintain self-discipline, express creativity, build self-confidence, and achieve emotional balance. Consequently, regular practice of music is highly beneficial for students' physical, mental, and emotional well-being.

Music plays a vital role in overall personality development. It not only provides joy and inner peace but also creates a positive environment that helps students remain emotionally balanced. Keeping these facts in mind, **Akhil Bharatiya Gandharva Mahavidyalaya Mandal** has introduced "**Sangeet Sanskar**" as a part of its curriculum from this academic year. As per the prescribed syllabus, every student will be evaluated annually by their respective teacher, and the annual assessment will be conducted on a grading basis.
